

ARUBA WATERLILY, RAFFIA WEAVE AND LINEN ON NON-WOVEN BACKING & NON-WOVEN TEXTILE WALLCOVERING

This new Omexco collection takes you to the exotic isle of Aruba, located in the Caribbean sea. Suddenly your interior will bathe you in peace and well-being, a shelter from chaos, a moment to catch your breath. It has become so rare nowadays to allow ourselves a chance to escape, even if just briefly...

Aruba evokes this precious planet, reminds us of its ephemeral dimension, and tells us to remember its territories and colours: the purity of its water, the light, the palm trees, the warmth of the sand...

Enter the universe of endless shades of blue: ocean, slate, teal, blueberry; shades of green: malachite, verdigris, water green; opal and pearl grey; orpiment yellow; lime, chalk and kaolin white; powder and sepia beige...

The textures are impregnated by our unique and harmonious universe... Weaves of authentic natural materials, linen yarns and ecological non-woven wallcoverings reflect the poetry of nature acting on all elements, eroded by sand, mattified by the wind, like the design on a stone, reflecting the horizontal lines of the landscape in the sand... A variety of different qualities and compositions, which can be perfectly combined.

Aruba recognizes craftsmen who respect and privilege natural materials (weaves of waterlily and raffia) and oblige us to remember ancestral know-how.

Evasion within reach... an excuse to indulge in contemplation...

Every single order is prepared individually, length on request (width of the different products: waterlily 110 cm, raffia 110 cm, linen 91 cm, non-woven 1 m). An ecological certificate is available for all items, and installation is easy thanks to a stable non-woven backing. The linen yarns and the non-woven wallcoverings have a european B s1-d0 fire rating. The non-woven wallcoverings have a marine certificate and can be used on cruise ships. They are "breathable" as well, and therefore suitable for installation in humid climates or environments.

More information and samples are available on request.
